APK Beta Release

[Download the latest beta APK here](#)

Strep Music Player

Strep is a modern, open-source music player for Android built with Flutter. This project is **still under development**. An APK release will be available when the app is feature-complete.

Overview

Strep is a modern, open-source music player for Android built with Flutter. It supports local audio playback, YouTube audio downloads, queue management, and a beautiful Dracula-inspired UI. The app is designed for speed, reliability, and customization.

Features

- **Local Audio Playback:** Play music files stored on your device (supports MP3, M4A, WEBM, and other common formats).
- **YouTube Audio Download:** Download audio from YouTube links directly in the app using `youtube_explode_dart`.
- **Music Library:** Import, browse, and manage your songs with album, artist, and all-songs views.
- **Queue & Now Playing:** Spotify-style queue management and a full-featured now playing screen.
- **Mini Player:** Persistent mini player for quick controls and navigation.
- **Edit & Delete:** Edit song metadata and remove songs from your library.
- **Custom Thumbnails:** Set custom artwork for your songs.

- **Persistent Storage:** Your library and playback state are saved between sessions.
- **File Picker:** Import music from any location on your device.

Codebase Structure

```
lib/
  main.dart                # App entry point, theme, and
navigation
  models/
    song.dart              # Song model and metadata
  providers/
    music_provider.dart    # State management for music,
queue, and playback
  services/
    audio_player_service.dart # Audio playback and queue
logic (just_audio)
  yt_service_explode.dart  # YouTube audio download and
info
  music_service.dart        # File system and permission
helpers
  song_metadata_service.dart # Metadata editing and
persistence
  song_storage_service.dart # Persistent storage for song
list
  image_service.dart        # Album art and thumbnail
helpers
  screens/
    music_list_screen.dart  # Main UI: song list, albums,
artists, mini player
    now_playing_screen.dart # Full now playing screen (not
shown above)
  widgets/
    youtube_download_dialog.dart # Dialog for YouTube downloads
    song_options_bottom_sheet.dart # Edit/delete song options
    song_thumbnail.dart        # Song artwork widget
    vinyl_disk.dart            # SVG vinyl disk backgrounds
    strep_icon.dart            # App icon widget
    queue_modal.dart           # Queue management modal
  theme/
    dracula_theme.dart        # Dracula color palette and theme
  utils/
    debug_logger.dart         # Debug logging utility
test/
  widget_test.dart           # Widget tests
```

Key Components

- **main.dart:** App entry, theme, and navigation. Initializes the music provider and shows the splash screen or main UI.
- **MusicProvider:** Central state manager for songs, queue, and playback. Handles loading, importing, editing, and deleting songs, as well as YouTube downloads.
- **AudioPlayerService:** Handles all playback logic, queue management, and persistent playback state using `just_audio`.
- **YouTubeDownloadService:** Downloads audio from YouTube links and creates Song objects for the library.
- **UI Screens:** Main music list, albums, artists, and now playing screens. Includes a persistent mini player and queue modal.
- **Widgets:** Modular UI components for song tiles, thumbnails, dialogs, and options.
- **Theme:** Dracula-inspired dark theme with custom gradients and colors.

Usage

- MP3
- M4A
- WEBM (YouTube audio)
- Most common audio formats supported by your device

Getting Started

Prerequisites

- Flutter SDK (3.10.0 or higher recommended)
- Android Studio or VS Code with Flutter extensions
- Android device or emulator (API 21+)

Installation

1. Clone the repository:

```
git clone https://github.com/lucifron28/strep_app.git
cd strep_app
```

2. Install dependencies:

```
flutter pub get
```

3. Run the app:

```
flutter run
```

Usage

- **Import Music:** Use the add (+) button to import audio files.
- **Download from YouTube:** Paste a YouTube link to download and add audio to your library.
- **Browse Library:** Switch between All Songs, Albums, and Artists tabs.
- **Play Music:** Tap any song to start playback. Use the mini player or now playing screen for controls.
- **Manage Queue:** Tap the queue button in the now playing screen to view and manage your up-next list.

How to Use

- **Import Music:** Tap the add (+) button to import audio files from your device.
- **Download from YouTube:** Tap the YouTube icon, paste a link, and download audio directly into your library.
- **Browse Library:** Switch between All Songs, Albums, and Artists tabs.
- **Play Music:** Tap a song to play. Tapping the currently playing song toggles pause/play. Use the mini player or now playing screen for controls.
- **Edit/Delete:** Long-press or use the options menu on a song to edit metadata or remove it from your library.
- **Queue Management:** Use the queue modal to view and reorder upcoming songs.

Permissions

- Storage/media access (to read and write music files)
- Internet (for YouTube downloads)
- Foreground service (for background playback)

Development & Contribution

- This project is actively developed. Features and UI may change.
- To contribute, open an issue or pull request on GitHub.

Future Improvements

- Notification player controls and lock screen controls
- Android Auto and Wear OS support
- Lyrics display and lyrics search

- Smart playlists and favorites
 - Folder-based browsing
 - Gapless playback and crossfade
 - Audio effects (equalizer, bass boost)
 - More file format support (FLAC, OGG, etc.)
 - Improved queue management (drag-and-drop, multi-select)
 - Custom themes and accent colors
 - Backup and restore library
 - In-app update notifications
 - Better error handling and user feedback
 - Performance optimizations for large libraries
 - More robust YouTube download options (quality selection, playlists)
-

- This project is **actively being developed**.
- Features and UI are subject to change.
- APK will be released when the app is ready for public use.
